

Nursing Assistant

Instructors Sonja Groenendaal, Rhonda Henderson and Lisa Keblish
CIP Code 51.0899

The Nursing Assistant program prepares students in the skills needed to care for those that need assistance with activities of daily living (bathing, eating, dressing, ambulation, toileting) as well as to assist patients in an acute care setting that may be suffering from an acute illness or injury.

For those student who are planning to continue their education in the medical field, this program prepares them with a strong health care foundation to build upon no matter their career choice. They will be able to work in a long term nursing facility, assisted living, a hospital setting, rehabilitation centers, physician offices or home health care.
