

E.R.I.E. (Every Room Is Environmental) Design Collaborative

The Erie School District and the Green Building Alliance's Green Schools Academy hosted the E.R.I.E. (Every Room Is Environmental) Design Collaborative this summer, challenging teams of students and professionals to design an ideal classroom or learning space with a "net zero" environmental impact.

Each team consisted of an environmentalist, a professional volunteer designer, a teacher and five to 10 students. The teams designed and built model learning spaces that incorporated natural and green design features.

13 projects from 12 schools.

Examples showcased here include:

- classrooms
- library
- play area
- cafeteria
- school garden

This summer program was sponsored by:
Green Building Alliance (GBA) and Erie School District
