Explore underwater sound waves using a bucket a plastic bottle and some water...visit this link to see the experiment: <https://www.stillplayingschool.com/2015/04/sound-under-water-experiment-kids.html>

Use tin foil, cups, Legos, or other things around the house to make two boats. Which boat can hold the most pennies (or marbles/rocks) and still float?

Wave Bottles

1. Use a funnel to pour

Watching the clouds so high (**look up and point**)
When along came a wave (**roll hands or make large wave movements with arms**)
and washed one away (**hold up 1 finger**).

Now we are 4 little sandcastles sitting on the beach....

**Repeat the poem and movements down to the last one.

After the last one is washed away:

...When along came a wave and washed it away.

Now there is nothing to say.

Here is a fun song to get up and dance like a whale have fun!

Retell the story using your own paper puppets that you can make at home.

Have fun with Gus and Inky on their underwater adventures.

Count the fish and click the number that matches how many fish you see.

https://www.abcya.com/games/counting_fish

*Practice counting from 0-50! Find objects around the house to count.

Maybe your family has some seashells that you could sort and count!

*Practice recognizing your numbers using your flash cards. Mix them up and name them out of order. I know you can do this! You are smart!

a cup full of baby oil (or cooking oil) into a clear plastic bottle.
2. Fill the bottle the rest of the way with water.
3. Give the liquid a chance to settle, then add a few drops of blue food coloring.
4. Add plastic "fish" (sequins), (glue the top on!) and make waves by turning the bottle sideways and rocking it gently.
