FREE STUDENT TUTORING

MIU IV is in collaboration with Slippery Rock University to offer FREE tutoring for children experiencing homelessness to bring additional support for their educational success.

How the process works:

1. Scan the QR code below to fill out the student application.

3. An account for the student will then be created on the tutoring platform, LearnSpeed.

4. The email address that was on the referral form will receive instructions to activate their LearnSpeed account.

5. The student will be matched with a Slippery Rock University tutor that has qualified for the tutoring position and has all of their necessary clearances.

6. Once the account is activated, you will receive an email with links to all your student(s) tutoring sessions, dates and times.
