Dear Parent/Guardian:

During the months of April and May the Erie School District will administer the 2016 Pennsylvania System of School Assessment (PSSA) to students in grades 3-8 and the Keystone exams to students taking Algebra I, Literature, and Biology. PSSA Science assessments involve grades 4 and 8. Some students in special education programs may be included in alternative assessments (PASA). PSSA test administration is mandated for all school districts within the Commonwealth. These assessments have been designed by the Pennsylvania Department of Education to help determine the agreement of district curriculum with state standards. Performance on the PSSA will become part of the School Performance Profile to be released in the fall of 2016. Students taking the state assessments will receive individual score reports. Your child's results will be distributed to you and the principal. The state will not receive any reports with individual names included.

You have the right to review the test items by making arrangements with the school principal. Students can be excluded from testing only if their parent/guardian finds the assessment items to be in conflict with their religious beliefs. Please read the attached flyer entitled: *Information for Parents or Guardians, Pennsylvania System of School Assessment (PSSA)* which will provide you with further information about the assessment.

Under state and federal law, the integrity of these tests cannot be compromised. The Pennsylvania Department of Education (PDE) prohibits cell phones and smart phones from entering the testing location during the test administration. The consequence for using and/or having a cell phone or other electronic device during the test administration will result in the application of a "do not score" label/flag on the student's test and the student will not receive a score. Furthermore, if a student uses a cell phone or electronic device in any manner during the administration of the test, the device will be confiscated until the parent or guardian can come to the school, and in the presence of the parent or guardian, the cell phone or other electronic device will be viewed to ensure that no information or material regarding the assessment is present. Under PDE regulations, violation of the no cell phone or other electronic device will result in disciplinary action, the severity of which will vary depending on whether test material has been compromised. If any item on an assessment has been compromised, and can no longer be used or needs to be replaced, the parent/guardian and/or student may be responsible for PDE's cost to replace the item/test statewide.

Please encourage your child to try their very best on these tests and be sure they come to school well-rested and ready to demonstrate all that they have learned this year. We thank you for your support of your student's achievement and appreciate your continued involvement in your child's education.

Sincerely,

Dr. Jay Badams
Superintendent of Schools

Information for Parents or Guardians

Pennsylvania System of School Assessment (PSSA)

English Language Arts Assessment, April 11–15, 2016

Mathematics Assessment, April 18–22, 2016

Science Assessment, April 25–29, 2016

GENERAL INFORMATION ABOUT THE PSSA

Which schools participate?

All school districts and charter schools participate in the assessments. Nonpublic schools may also participate on a voluntary basis.

Which students take the assessments?

Except for a very few students who meet specific criteria for participation in an alternate assessment, all students are included in the assessments as outlined below:

ELA & Mathematics – Grades 3, 4, 5, 6, 7, and 8

Science – Grades 4 and 8

Who decided what the assessment should measure?

Groups of educators from all levels of education in Pennsylvania chose the areas of knowledge and skills upon which the assessment is based. The groups included teachers, supervisors, curriculum directors, and college specialists. They also reviewed, edited, and approved the test items.

Who administers the assessment?

Each school chooses the person(s) who will administer the assessment. In most cases, these are teachers in the students' building.

How are the results reported?

Two copies of the individual student report for all assessments will be sent to all schools and districts that participate for distribution to parents, teachers, school counselors, and/or principals. The state will not receive any report with individual names included.

School-level reports will be used for curricular and planning purposes. School districts and charter schools may publish the results of PSSA testing for each school. The state will also release school-by-school assessment data.

May parents see the assessments?

Yes, under one circumstance. School entities are required to have policies to assure that parents or guardians have the right to review a state assessment in the school entity during convenient hours for parents or guardians at least two weeks prior to their administration to determine whether a state assessment

conflicts with their religious belief. This is the only reason allowable under regulation.

Confidentiality agreements must be signed, and no copies of the assessments or notes about assessment items will be permitted to leave the school. If after reviewing the test, parents or guardians find the test to be in conflict with their religious belief and wish their student (s) to be excused from the test, the right of the parents or guardians will not be denied upon written request to the applicable school district Superintendent, charter school Chief Executive Officer, or AVTS Director. Parents or guardians should contact their child's school to make arrangements to review the test.

INFORMATION ABOUT THE ENGLISH LANGUAGE ARTS ASSESSMENTS (grades 3–8)

How long does the assessment take?

The entire English Language Arts assessment takes approximately three to four hours to complete. Your school district will inform you about the assessment schedule.

What does the assessment include?

Each student completes four sections of questions for the English Language Arts assessment. Some portions will be the same for all students, and some will consist of different groups of questions.

What types of questions are on the assessment?

Students respond to three types of questions: multiple-choice, evidence-based selected response, and constructed-response. In a multiple-choice question, the correct answer is chosen from four options. Evidence-based selected response questions have two parts, and students select one or more answers for each part. Constructed-response questions require students to compose their responses. These include a writing prompt, short-answer questions (grade 3 only), and text-dependent analysis questions (grades 4–8 only). The writing prompt requires students to compose a response using one of three modes (narrative, informative/explanatory, or opinion in grades 3–5 and narrative, informative/explanatory, or argumentative in grades 6–8). Short-answer questions require students to compose a brief response to support their answer. For the text-dependent analysis question, students analyze a text and use evidence from the reading passage to compose an essay.

How are written responses to constructed-response items scored?

The written responses for English Language Arts are scored by evaluators trained in applying an ELA-specific scoring guideline. For short-answer questions, scores are based on content only. Spelling and punctuation are not included as part of the scoring process. For writing prompts, scores are determined using a holistic scoring guideline that includes composition skills as well as conventions. Responses to text-dependent analysis questions are scored based on both content and writing skills.

What is assessed in English Language Arts?

The English Language Arts assessment addresses six major reporting categories as well as two text types. Students respond to standalone multiple-choice items assessing language and a writing prompt. Additionally, students read a number of passages from literature and informational genres and respond to questions about these passages that indicate both comprehension and reading skills and the students' analysis and interpretation of different types of texts.

INFORMATION ABOUT THE MATHEMATICS ASSESSMENT (grades 3–8)

How long does the assessment take?

The entire mathematics assessment takes approximately three to four hours to complete. Your school district will inform you about the assessment schedule.

What do the assessments include?

Each student completes three sections of questions for the mathematics assessment. Some portions will be the same for all students, and some will consist of different groups of questions.

What types of questions are on the assessments?

Students respond to two types of questions: multiple-choice and open-ended. In a multiple-choice question, the correct answer is chosen from the four presented options, while open-ended questions require students to compose their responses. Open-ended questions generally require students to provide detail in support of their answers (such as showing or describing the steps performed to complete a calculation).

How are written responses to open-ended items scored?

The written responses for mathematics open-ended items are scored by evaluators trained in applying a mathematics-specific scoring guideline. In mathematics, scores are based on content only. Spelling and punctuation are not included as part of the scoring process.

What is assessed in Mathematics?

The mathematics assessment addresses five major reporting categories across four clusters. The reporting categories assessed and the proportion of items in each reporting category vary by grade level. As a part of the assessment of Cluster A, Numbers and Operations, students in grades 4–8 respond to a section of items in which a calculator is not permitted. Constructed-response items may require the students to show all of their work (calculations, graphs, drawings, etc.) and/or to explain in writing how they solved the problems.

INFORMATION ABOUT THE SCIENCE ASSESSMENT (grades 4 and 8)

How long does the assessment take?

The entire science assessment takes approximately two to four hours to complete. Your school district will inform you about the assessment schedule.

What does the assessment include?

Students in grades 4 and 8 complete two sections of questions for the science assessment. Some portions will be the same for all students, and some will consist of different groups of questions.

What types of questions are on the assessment?

Students respond to two types of questions: multiple-choice and open-ended. In a multiple-choice question, the correct answer is chosen from the four presented options, while open-ended questions require students to compose their responses. At grade 8, the science assessment also includes science scenarios.

What is a science scenario?

A science scenario contains text, graphics, charts, and/or tables, and uses these elements to describe the results of a class project, an experiment, or other similar research. Students use the information found in a science scenario to answer multiple-choice questions.

How are the written responses to open-ended items scored?

The written responses for science open-ended items are scored by evaluators trained in applying a science-specific guideline. In science, scores are based on content only. Spelling and punctuation are not included as part of the scoring process.

What is assessed in science?

The science assessment addresses the four major reporting categories: The Nature of Science, Biological Sciences, Physical Sciences, and Earth and Space Sciences. The proportion of items in each reporting category varies by grade level.
