

Construction Trades

**Instructors Daryl Herman
and Michael Trippi
CIP Code 46.9999**

Check out Erie High's Construction Trades program...Students in this program will learn from experienced instructors who are able to certify them in NCCER curriculum. NCCER Certification is the only nationally accredited, competency-based construction training program in the United States and we offer it here at Erie High!

Students will be able to use a variety of tools found in industry including our program's own Kubota Track Loader and 3 heavy equipment simulators.

Students exiting the Construction Trades program are well prepared to enter directly into the workforce or advance right into an apprenticeship program with excellent starting pay and benefits. Some may even advance to higher positions such as foreman or superintendent within the field or learn the skills to start their own construction company.
