

Name \_\_\_\_\_

**Family Note**

We are reviewing the relationship between numbers and quantities. Have your child count the objects in each group below then circle the number that goes with it. Having children count objects around the house or when out is a good practice for this skill.

Count the objects. Circle the correct number.

1                      2                      3

6                      8                      10

3                      4                      5

2                      3                      4

4                      3                      2

5                      4                      1

4                      3                      2

5                      4                      1
