

**Family Note:** Turn-around addition facts are pairs of facts where the numbers being added are the same. Turn-around facts have the same sum.

For example;  $2 + 3 = 5$  and  $3 + 2 = 5$  are turn-around facts. Knowing about turn-around facts cuts down on the number of facts that have to be memorized: If you know a fact, you also know its turn-around facts.

*Please return this Home Link to school tomorrow.*

Find the total number of dots on the dice.  
Use turn-around facts to help you.

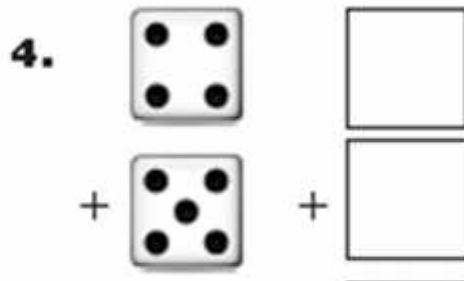

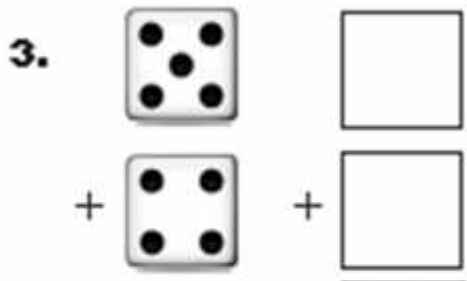

Unit
dice dots

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

### Practice

Solve the riddles.

5. 2  and 4  = \_\_\_\_\_

6. 4  and 7  = \_\_\_\_\_
