

We are continuing work on adding multiples of 10 to a 2-digit number. Today we continued using our base-ten blocks and a number grid to do this. While completing this homework, help your child understand that when they add they are placing more blocks together or counting up on a number grid.

Solve.

$17 + 50 = \underline{\quad}$

$50 = \underline{\quad} \text{ tens}$

$49 + 20 = \underline{\quad}$

$20 = \underline{\quad} \text{ tens}$

$50 + 40 = \underline{\quad}$

$40 = \underline{\quad} \text{ tens}$

$13 + 60 = \underline{\quad}$

$60 = \underline{\quad} \text{ tens}$

$24 + 30 = \underline{\quad}$

$30 = \underline{\quad} \text{ tens}$

$53 + 20 = \underline{\quad}$

$20 = \underline{\quad} \text{ tens}$

$19 + 10 = \underline{\quad}$

$10 = \underline{\quad} \text{ tens}$
