

**Family Note**

Students are practicing measuring with nonstandard units of measurement. In class we measured with our thumbs, hands, feet, and more. Please help your child measure objects at home with these nonstandard linear units. Remember to measure "end to end" to get a more accurate measurement.

Measure some objects in your house. Record the object and the measurements.

Unit	Picture	Object	Measurements
digit			about ____ digits
yard			about ____ yards
hand			about ____ hands
pace			about ____ paces
cubit			about ____ cubits
arm span (or fathom)			about ____ arm spans
foot			about ____ feet
hand span			about ____ hand spans
