Factor Rainbows

Study Link

R-5

When listing the factors of a number, you need to be certain that you have included all the factors in your list. Creating a factor rainbow is one way to do this. A factor rainbow is an organized list of factor pairs.

To the right is the factor rainbow for 36. Because 36 is a square number, one of the factors (6) is paired with itself.

Complete a factor rainbow for each number.

1.

56

2.

48

3.

81

4.

72
