

**Family Note**

Students are working to make combinations of coins to represent a number. For example, if the number is 30, students can show this using 3 dimes or 2 dimes and 10 pennies. In first grade, the focus is on using dimes and pennies. Other coins are expected in 2<sup>nd</sup> grade.

*Please return this Home Link to school tomorrow.*

Make combinations using coins to represent each number in the box. D is for Dime and P is for penny. Add 3 different representations in each box.

<b>34</b>	
Example: DDDPPPP	

<b>52</b>	
Example: DDDDPPPPPPPPPPPP	

<b>28</b>	

<b>47</b>
