

**Family Note**

Today children were introduced to 2-Fisted Penny Addition. They use pennies to find the total number. At this point the total pennies or sum is always 10. Knowing the combinations of numbers or complements that make 10 is a Grade 1 Goal. Practicing this skill often will help your child in this addition unit.

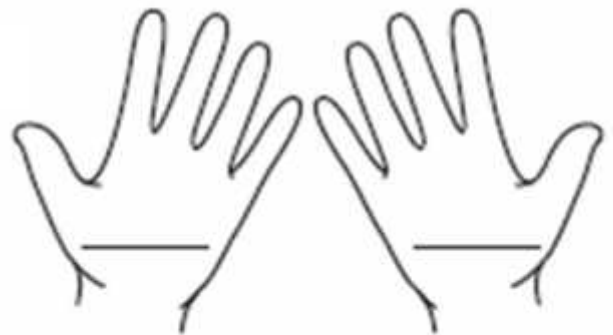

*Please return this Home Link to school tomorrow.*

Use 10 pennies to find the complements of 10. Write the number of pennies you used in each hand to make sums of 10.
