**Family Note**

First grade is working on building “fact power”. Knowing our addition facts by heart will help us with more difficult addition problems. Practicing these facts at home daily is one way your child can build that fact power. Today we learned about double facts. The fact cards below will help your child know their double facts in a snap.

Cut out the cards below on the lines. Ask an adult or older brother or sister to show you the facts. See how many you know without counting. Practice each day and try to beat your score from the day before!

$1 + 1$	$2 + 2$
$3 + 3$	$4 + 4$
$5 + 5$	$6 + 6$
$7 + 7$	$8 + 8$
$9 + 9$	$10 + 10$
