### Family Note

To provide your child with additional practice using the  $-0$  and  $-1$  subtraction rules, have them subtract 0 and 1 from a variety of 1 or 2-digit numbers up to 20. For example;  $14 - 0$  or  $14 + 1$ . Have them apply both rules to one number so they can see how the number changes according to the rule.

*Please return this Home Link to school tomorrow.*
