

**Family Note**

To help children add and subtract 10 mentally we have been working with patterns on the number grid. The children were noticing today that when we move up or down the columns on the number grid the tens digit changes. And when we move across or back on a row the ones digit changes. Using this, have your child complete the number grid pieces below.

*Please complete and return to school tomorrow.*

Directions: Fill in the missing numbers.

1.

53

2.

23		
43		

3.

	79	

Review. Write the hands on the clock to show the time.

4:30

11:00
