

Family Note

Ask your child to explain how to count up and back by 10s on the number grid. The number grid is a tool that students can use to solve addition and subtraction problems with multiples of 10. To add 10 they should be moving down one row for every 10, and to subtract they should be moving up one row for every 10.

Please complete and return to school tomorrow.

Directions: Read each problem. Write an equation to go with each problem. Check your work to be sure you have the correct symbols and answer.

-9	-8	-7	-6	-5	-4	-3	-2	-1	0
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

1. Daryl got 75 stickers at the store.
He gave away 30 stickers.
How many stickers does Daryl have left?

2. Jayda has 12 pieces of gum.
She bought 20 more pieces of gum.
How many pieces of gum does Jayda have now?
