

Name _____

1. How many paper clips equal the length of the 2 pencils? _____
2. How many paper clips equal the length of the longer pencil? _____
3. How many paper clips equal the length of the shorter pencil? _____

Now measure 3 objects in your home with any nonstandard unit. (paper clip, pencil, linking cube, digit{thumb}, hand span)

I used _____ to measure.

In the first box write the name of the object. Then write the number of units of its length. Write and measure all 3 objects. After measuring all three objects, put a 1, 2, or 3 in the comparison boxes. Order them from shortest (1) to longest (3).

Object Measured	Number of Units Long	Comparison
