

4-4 Measuring in Centimeters

Family Note Children are beginning to use metric units to measure length (in addition to the U.S. customary units of inches and feet). Your child should measure objects to the nearest centimeter. Make sure your child lines up one end of the object being measured with the "0" mark on the ruler.

Please return this Home Link to school tomorrow.

Find four small objects. Draw a picture of each object. Use your ruler to measure each object to the nearest centimeter (cm). Record your measurements.

1. About _____ cm long	2. About _____ cm long
3. About _____ cm long	4. About _____ cm long
