

Home Link 8-4 Adding Three

Family Note: Sometimes the order in which you add numbers can make it easier to find the sum. For example, when adding 17, 19, and 23, some people may first calculate $17 + 23$, which equals 40, and then add 19 ($40 + 19 = 59$). For problems 1-4, help your child look for easy combinations.

Please return this Home Link to school tomorrow.

For each problem:

- ◆ Think about an easy way to add the numbers.
- ◆ Write a number model to show the order in which you are adding the numbers.
- ◆ Find each sum. Tell someone at home why you added the numbers in that order.

1.

Number model:

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

2.

Number model:

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

3.

Number model:

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

4.

Number model:

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$
