

Solve the following problems. Show your solution strategy.

Miranda has 24 coins. She has pennies, nickels, dimes and quarters.

$\frac{1}{4}$  of the coins are nickels. How many of the coins are nickels?

$\frac{1}{3}$  of the coins are dimes. How many of the coins are dimes?

$\frac{1}{8}$  of the coins are quarters. How many coins are quarters?

The rest of the coins are pennies. How many pennies does Miranda have? What fraction of the coins are pennies?

Bonus: How much money does Miranda have altogether?
