## Divide Multiples of 10 & 100

Divide each. Show your work and/or explain your strategy.

$$40 / 8 = \underline{\hspace{2cm}}$$

$$60 / 12 = \underline{\hspace{2cm}}$$

$$300 / 10 = \underline{\hspace{2cm}}$$

$$900 / 3 = \underline{\hspace{2cm}}$$

There are 90 4<sup>th</sup> graders at Pine Tree Elementary. Last Tuesday, 10 of them were absent. If the same number of students was present in each of the 4 classes, how many students were present in each class? \_\_\_\_\_ **students were present in each class.**

200 children were seated in rows for a magic show. If there were 8 rows, how many children were in each row? \_\_\_\_\_ **children were in each row.**
